

# SUPPLY AIR UNIT

## SAU 125 C1 EC

- An insulated supply air unit with circular connections.
- Designed to provide a comfortable indoor climate with controlled heating and filtered, clean air.
- The unit has an external control unit for operating and to preset the required temperature as well as monitor the unit's status.
- Low sound level, high operating reliability and provides clean indoor air.
- Comes with Modbus communication via RS485 as standard.
- Comes complete with filter, fan, duct sensor and electrical heater as standard.

- Airflow is generated by a silent radial fan with EC motor, impeller with backward curved blades.
- The fan house and impeller is easy to clean.
- Comes with filter ISO ePM1 50% as standard. The filter is very easy to change.
- Duct connections are equipped with rubber seals.
- The unit is constructed from galvanized steel sheet and insulated with an easy to clean 30 mm fiberglass.
- For placement in warm or cold areas.

### ACCESSORIES

- Filter ISO ePM2.5 60%
- Remote control
- Antenna
- Duct sensor
- Room sensor Temp
- Carbon dioxide sensor CO<sub>2</sub>
- Humidity sensor RH
- Silencer LDC 125
- Mounting clamp MK 125
- Back draught shutter RSK 125
- Safety grille BSR/BSV 125
- Louvre shutter VK 125

# healthy indoor climate

ÖSTBERG 

**THE SUPPLY UNIT SAU EC** is small, compact and designed to provide a comfortable indoor climate in smaller premises such as warehouses, workshops, stairwells and workstations. SAU EC heats and filters the supply air using its smart control system. With the possibility of scheduling temperature and air flow, the ventilation is adapted to the use of the room. The units are supplied complete with filters, fan and heater.

## NEWS SAU EC

- EC motor
- Meets ErP Lot6 2018
- Simple installation with 2-parted door
- Integrated control with efficient energy saving functions and built-in weekly schedule.
- Can be regulated based on supply air temperature, room temperature, CO<sub>2</sub>, humidity, constant pressure with stepless increase of air flow.
- Preheat the supply air to the desired temperature (5-30 C°)
- Prepared to control external cooling
- Modbus communication via RS485
- Small, compact and easy to clean
- Filter class ISO ePM1 50%
- Automatic filter guard indicating filter change
- Possibility to control the extract air fan
